CYCLONIC WATER SEPARATOR - CYCL0120 BY PEERLESS

SKU	Option	Part #	Price
1041004		CYCL0120	\$467.5

Model	
Type	Water Separator
SKU	1041004
Part Number	K4215
Brand	Peerless
Packaging + Shipping	
Shipping Weight (Gross)	1.5 kg

The cyclonic condensate separators have been developed for high efficient removal of bulk liquids from compressed air. Inside the housing there is an insert with vanes that creates controlled rotation of the air. As a result of centrifugal action liquids (water, oil) and large particles are forced to the housing wall, slowed down and accumulated at the bottom of separator housing as condensate.

The turbulent free zone in the lower part of the filter housing prevents condensate from being picked up and "carried over" into the airstream.

Maintenance

Once per year make a visual check of separator housing and make sure there is no visual damage. At least every six months check if condensate drain is operating properly. Wash the internal element with warm soapy water to remove oil residue.
