Most air compressors run continuously even when you're not using the air. This machine will perform to your requirements and save you money at the same time by only doing the work that you want it to do!

Our HQD Variable Speed Compressors will reduce your power consumption and give you a quick return on your investment within no time. The 10HP models have a great output of 1000 Litres per minute at 8 Bar this compressor is designed for 6 - 8 person workshops easily keeping up with high demand.

For ease of use it features an LED touchscreen control panel allows the user to easily operate and view the functionality of the air compressor along with viewing service times which are based on run hours. Operating pressure can be viewed in MPA or PSI along with the ability to view energy consumption.

With the Peerless Rotary Screw Compressors, we test each model prior to
