Universal Guide for Nozzle 0059 by Pizzi

This steel guide is to be used to anchor to a pinpoint nozzle to provide an edge guide for steady and consistent glue application. This allows for a new level of accuracy and speed in straight-line edge glue work. The Universal Nozzle 0003 and Dispensing Gun 0002 are sold separately. This is a metal guide to be used on an existing universal nozzle to provide a consistent glue line along an edge. Compared to working manually with glue bottles, the entire job is done within seconds and with complete confidence. The Universal Nozzle 0003 is sold separately.
