23MM SATIN FINISH COMBINATION SPANNER CM23C BY KINCROME

The range of Kincrome Spanners which has undergone exhaustive independent testing, is now 80% stronger than the ASME (American Society of Mechanical Engineers Standard) and 130% stronger than the German DIN standard. The stronger, lighter and greatly enhanced quality of the Kincrome spanner range leaves many name brand competitors in its wake.

Features include a thinner head allowing the spanner to reach tighter areas, a rounder shaft for a more comfortable grip when applying greater torque, a lighter weight, and the shorter length decreases radial movement by up to 20%.

Construction of the range is from forged Chrome Vanadium Steel (Cr-V) hardened, tempered and chrome plated with a slight satin finish for corrosion protection. Increased Molybdenum Manganese and Nickel content provide greater strength and corrosion resistance.

SKU	Option	Part #	Price
38732		CM23C	\$59.95

Model	
Type	Combination Spanner
SKU	38732
Part Number	CM23C
Barcode	9312753400305
Brand	Kincrome
Size	23mm
Technical - Main	
Finish	Satin
Imperial (SAE) / Metric / Torx	Metric
Material	Chrome Vanadium Steel (Cr-V)
Offset (Degrees)	15
Dimensions	
Product Length	346 mm
Product Width	50 mm
Product Height	25 mm
Product Weight (Net Weight)	0.24 kg
Packaging + Shipping	
Shipping Weight (Gross)	0.24 kg
