The LA-120 Profiled Leather Honing Wheel allows you to hone and polish the inside of tools with curved edges where access is otherwise difficult. Honing your woodturning gouges, carving gouges and V-gouges will be a walk in the park. The LA-120 Profiled Leather Honing Wheel fits all Tormek water-cooled sharpening systems and is mounted on your regular honing wheel.

Why LA-120 Profiled Leather Honing Wheel?

Polishes the bevel and deburrs the edge on the inside of arched edges.

Maintains your tools between sharpenings.

Quality cowhide that lasts year after year.

Fits the Tormek T-8, Tormek T-4 and older models.

Hones arched edges

You simply mount the LA-120 Profiled Leather Honing Wheel on the outside of your regular honing wheel. This allows you to hone the outside of your arched edge tool on your regular honing wheel, and then easily switch to honing the inside on the profiled wheel that fits your tool.

The LA-120 Profiled Leather Honing Wheel comes with two standard leather discs. The first one has a radius of 3 mm (1/8") for honing gouges and the like. The second one has a 60° tip for tools such as V-gouges.
