Part Number	SVA-170
Barcode	7392485002086
Brand	Tormek
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

Features

With the Tormek original axe jig SVA-170 you can sharpen your axes to a superior sharpness without the risk of overheating. The axe rests firmly in the jig and is sharpened with a constant edge angle.

The jig comprises a clamp with a rubber lined, wedge shaped stop, which holds the axe in a fixed position towards the grindstone. The clamp works on the Universal Support, on which it slides across the stone.

The jig is designed so that the rotation of the stone presses the axe firmly into the jig. You only need to hold and guide the axe with your hands. This jig only works with the stone running towards the edge. If necessary, the honing wheel can be removed to allow clearance for the axe handle.
