Part Number	PA-70
Barcode	7392485001096
Brand	Tormek
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

Honing Compound PA-70 by Tormek

When new, impregnate the leather with light machine oil.

This will soften the leather and cause the honing compound to penetrate the leather.

Apply a thin string of the honing compound before starting the machine. Rotate the wheel by hand.

Start the machine and distribute the compound by pressing a tool gently against the wheel. Let the compound penetrate the leather.

One application lasts for 5-10 tools. Then re-impregnate the honing wheel with a few drops of oil and apply fresh honing compound. Work the honing compound into the leather. Do not let the compound dry, apply more oil if necessary.

Always hone away from the edge!

If you hone towards the edge, it cuts into the wheel!
