Shipping Weight (Gross)	9.85 kg

UC16K is designed for making frontal and lateral recesses for any kind of lock on doors and frames. Designed for use with Router FR66P, it is especially recommended for making recesses for locks that open with magnetic anti-panic cards and special opening devices. Its exclusive attachment system by means of clamp vises enables the user to mortise doors that have already been hung without damaging the surface. Secure, reliable grip. Works horizontally also. UC16K includes a height bar, making possible identical recesses on several doors at the same height, with no need to readjust the lock mortising template holder.
