LOCK MORTISING TEMPLATE HOLDER UC16K BY VIRUTEX

UC16K is designed for making frontal and lateral recesses for
any kind of lock on doors and frames. Designed for use with
Router FR66P, it is especially recommended for making
recesses for locks that open with magnetic anti-panic cards
and special opening devices. Its exclusive attachment system
by means of clamp vises enables the user to mortise doors
that have already been hung without damaging the surface.
Secure, reliable grip. Works horizontally also. UC16K includes
a height bar, making possible identical recesses on several
doors at the same height, with no need to readjust the lock
mortising template holder.
