5/16" Imperial Reversible Combination Gear Spanner

K030011 by Kincrome The Kincrome Gear Spanner has all the benefits of standard spanners and more. The strong fine gear ratcheting ring end needs as little as 5 ° of sweep to move fastener, a standard fixed ring end needs a minimum of 30 °, or 6 times the area. The narrow and thin head, combined with fine gear tooth design makes the Kincrome Gear Spanner suitable for working in tight and hard to access areas where a ratchet and socket will not fit. **Features:-**

The Kincrome Reverse Gear spanner has a 13 ° offset angle on the head, providing greater clearance in the working area for the user's fingers

The reverse switch eliminates the need to turn over the spanner when changing direction, allowing the user to complete a job faster
