

CT EXTRACTOR CYCLONE PRE SEPARATOR 204083 BY FESTOOL

SKU	Option	Part #	Price
5008450		204083	\$685

Model	
Type	Dust Collector Bucket
SKU	5008450
Part Number	204083
Barcode	4014549327111
Brand	Festool
Size	20L
Dimensions	
Product Length	395 mm
Product Width	295 mm
Product Height	515 mm
Product Weight (Net Weight)	7 kg
Features	
Standard Inclusions	Disposal Bag
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

The Festool CT Pre Separator with cyclone technology separates and collects coarse and fine dust before it reaches the mobile dust extractor. The dust heavy air that is drawn in is swirled into a spiral movement in the cyclone, causing the dust particles to hit against the wall of the cyclone and, due to the gravitational force, to fall into the collection container of the CT pre separator. For craftsmen who work with large volumes of dust and debris, the CT Cyclone pre separator is the simplest answer for increasing the efficiency of your CT Dust Extractor and minimizing its lifetime cost of ownership all within a compact solution that fits seamlessly into the Festool Systainer modular storage system, allowing for easy storage and transportation. Remove larger dust and debris before it fills your filter bag by using the CT Cyclone and reduce how often you need to replace filter bags and filters. Maintains a consistently high suction power as a result of reducing the dust load on the main filter. **Features:-**

Cyclone Technology - Dust heavy air is drawn in and swirled into a spiral movement in the cyclone, causing the dust particles to hit against the wall of the cyclone and thanks to gravitational force, to fall into the collection container of the CT Pre Separator.

Ideal for demanding everyday site work - Handles high levels of dust thanks to cyclone technology. Ensures constantly high suction power thanks to the removal of load from the main filter.

Easy Disposal - Convenient and secure transportation thanks to stackable collection containers with compact dimension.

hello@beyondtools.com

Convenient view of the filling level thanks to a transparent material.

Convenient and Robust - The modular structure enables easy cleaning of the individual parts. Sturdy components for a long life.

Working with constant suction power - Up to 80% of mineral dust and 95% of coarse dust such as sawing chips is separated out and collected.

Flexible To Use - The T-Loc system ensures flexibility in working with or without your separator. Simply loc on to your extractor.
