Compatible with 18V XR and 54V XR FLEXVOLT batteries and capable of 3,200 strokes per minute, this DEWALT cordless jigsaw is ideal for cutting hardwood, plywood and sheet materials. Featuring a stabilising blade clamp system, a blade guide, and an ergonomic body grip design for enhanced comfort, control and precision. **Features:-**
This DEWALT jigsaw delivers up to 3,200 strokes per minute for professionals working with a range of materials from hardwood, to veneers, to aluminium. Efficient power transfer from the 18V XR battery to the brushless motor ensures a whole day's work on a single charge.
The body grip or barrel grip design lets this jigsaw be used from underneath the workpiece. The ergonomic shape of the grip makes it easier to cut around tight curves while twin LED lights help illuminate the workspace.
An intelligent variable speed trigger on the handle with a separate lock-off switch offers greater control, while a variable speed dial allows one-handed speed adjustment. A new clamp system and blade guide enable a square cut to face and reduced risk of blade movement.
