Dimensions	
Product Height	2100 mm
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

The Brighter, Tougher, Taller Stand Light â€œ M18™ Dual Power Tower Light is designed to give professionals an area lighting solution that adapts, performs, and survives industrial use unlike any other portable work light. The M18DSAL-0 can be setup in seconds with its max extension 2.1m high, and it collapses down to 1.2m for easy transport and storage. The light head can be extended from 1.2-2.1m to light overhead work or minimise shadows when casting light downward. Capable of filling large areas with light, it provides 2,500 lumens of high definition light output for in its high mode, 1,100 in medium and 700 in low, and it can run for up to 7, 14, or 2 hours with an M18™ REDLITHIUM ®-ION 9.0 Battery Pack. It uses high quality LEDs with a neutral white color and a high color rendering index paired with a Milwaukee ® designed reflector to produce an even beam pattern. Its reinforced legs are impact resistant, and its low center of gravity provides a stable base. The light head is protected by an impact-resistant lens and bezel, and it nests into a protective shroud for secure transport and storage. Its LEDs never need to be replaced, and are backed by a limited lifetime warranty. The light also has an AC inlet for dual powered options, so that regardless where you are on the jobsite you will always be able to light the jobsite. The combination of these technologies offers professionals the highest quality LED lighting solution, on or off the jobsite.

Features:

Sets up in 5 seconds, 2.1m extension.

Compact 66cm footprint with low centre of gravity.

Rotating and Pivoting head.

Three light output modes for optimal brightness and runtime.

High definition output with true colour, even beam, and natural light.
