Features:

- **Torsion Control zone** - Absorbs extreme torque loads to optimise control whilst preventing fastener cam-out, extending the lifetime of your impact bit.
 - **Magnetic Precision Tip** - CNC machined tips offer a precise fit to prevent stripping and fastener cam-out, magnetised for ultimate control
 - **Impact Performance** - PTA is uniquely designed for extreme impact and torque applications. This accessory is manufactured from S2 steel, machined and heat treated
 - **Magnetic Lobular Head** - Subtle cam in-hex design applies driving force to the flat surface of the fastener, preventing damage to its corners and a reduction in potential round-off
 - **Magnetic Quick Release** - Quick release coupler provides quick change overs of 25mm driver bits. Simply push the knurled grip forward to eject the bit (Fits all other 1/4" driver bit lengths)
 - **Magnetic Extreme C-Clip Coupler** - Impact rated for high torque applications, driver bit is retained with a magnet and our EXTREME strength C-Clip. Our coupler has been designed so the driver bit will NOT eject free when in use. NOTE: driver bit is NOT removable by hand, pliers will need to be used to remove the bit. For regular bit changes, use the Kincrome Quick Release Coupler
 - **Socket Driver Adaptor** - Available in 1/4", 3/8" and 1/2" drive, the socket driver adapts a socket onto your 1/4" impact driver or standard drill driver. NOTE: If using an impact driver, you MUST use an impact rated socket
