Makes it possible to create precisely guided plunge cuts, saw with minimal dust generation and make plunge cuts to a defined depth. Includes an adapter for fitting accessories without tools. **Main Application:**

Precision placement on scribe marks

Virtually splinter-free sawing of delicate surfaces

Greater accuracy with the positioning aid: ideal for cutouts in delicate materials

An extractor can be attached when carrying out sawing work indoors that generates large amounts of dust

Perfect for working with mineral-based materials (such as plasterboard) and for sawing above head height

Plunge cuts with a defined depth to protect the saw blade

Dust extraction device

For sawing with minimal dust and having a clear view of the workpiece. Ideal for sawing above head height.

Positioning aid

For precisely guided plunge cuts. With integrated depth stop and extractor connector.

Depth stop

For precisely defined plunge cuts to protect the saw blade.
