Shipping Weight (Gross)	1.48 kg

Light and still amazingly strong. The 10.8V TXS cordless drill with classic T shape impresses on account of its exceptional torque which works powerfully, even in hard-to-reach places. The extremely compact design and even weight distribution make it ideal for overhead work. And its long-lasting lithium-ion battery packs with charge state indicator, CENTROTEC quick-change system and twelve-stage torque adjustment and cut-out make it perfect for professional use.

Main applications

Furniture assembly and kitchen fitting

Installation of skirting boards, boxes, lamps, curtains

Installation of wheel housings and door panelling

Easy drilling and screwdriving in wood, metal and plastic

Amazingly powerful

A real powerhouse: With its 10.8V lithium-ion battery packs, the TXS meets all challenges. Torque can be adjusted precisely in twelve stages for controlled power development.

Work comfortably

Also comfortable for overhead work thanks to perfect ergonomics, low weight and T-handle.

CENTROTEC quick-change system

Fast change between drilling, countersinking and screwdriving: The CENTROTEC quick-change system is a chuck and bit holder in one and, at the same time, 50% smaller and 80% lighter than a standard drill chuck.

Ideal for tight spaces

As with all cordless drills from Festool, the bits can also be inserted in the direct bit holder of the spindle on the TXS.

Everything is close to hand in an instant

Keep your hands free at the right moment by conveniently attaching the machine to your belt: The belt clip is suitable for right- and left-handers, without the need for tools.

Four bits always to hand

The practical bit holder provides space for up to four bits – magnetically secured against falling out.

In the smallest of spaces

The angle attachment is perfect for work around corners and reaching concealed screws at tight angles.

Chuck for standard tools

The chuck with a standard width of up to 10 mm is always included in the scope of delivery – for all tools with a

cylindrical shaft. Tool-free mounting via the FastFix interface.

Optimal lighting

The integrated LED light permits precise work even in dark corners.

Electronic

Speed control for adjusting to the working material.

FastFix

Makes changing accessories or consumables for routing, sawing, planing, sanding, drilling and screwdriving tools easier.

Torque Shut Off

Intelligent technology ensures the optimum screwdriving force for every material.

Lithium-ion battery
