

## 18V PHONE CHARGING ADAPTOR 577155 BY FESTOOL

SKU	Option	Part #	Price
5014658		577155	\$150

Model	
Type	Phone Charging Adaptor
SKU	5014658
Part Number	577155
Barcode	4014549399637
Brand	Festool
Features	
Standard Inclusions	1 x Phone charger PHC 18
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

No more empty smartphone batteries: The PHC 18 phone charger acts as a clever adapter that transforms every Festool 18 V battery pack into a power bank (with the exception of 3.1 Ah Ergo battery packs). No more searching for a free socket or worrying about whether your smartphone battery will last until the end of the day. This means that your mobile phone is always ready to use. In addition, despite its compact design, it can supply up to three smartphones with power at the same time – both via users' own charging cables and inductive charging.

### Features:

**Be independent of classic power sources:** When combined with a charged Festool 18 V battery pack, it is possible to charge your mobile phone even when there are no sockets nearby

**Compatible:** just like a classic cordless tool, the phone charger can be used as a smartphone charging station on all 18 V battery packs from Festool (with the exception of 3.1 Ah Ergo battery packs)

**Inductive charging:** If there is no mobile phone charging cable to hand, you can also charge the phone wirelessly (provided that the mobile phone or smartphone supports inductive charging)

**Charges three smartphones at the same time:** Its classic USB-A and USB-C ports and its inductive charging surface, enable three mobile phones to be charged at the same time

**Powerful:** All three charging options (USB-A port with 12 W, USB-C port with 12 W, inductive charging surface with 8.5 W)

ensure rapid charging progress

Long-lasting: for example, when combined with a fully charged 5.2 Ah standard battery pack, a mobile phone with a battery capacity of 3000 mAh can be charged up to eight times

Robust: The PHC 18 phone charger is more robust than a conventional power bank and is made for everyday work because it is designed like the 18 V battery packs. In addition, the rubberised surface ensures that smartphones are held securely during inductive charging

Compact: With the dimensions of a 3.1 Ah Compact battery pack, the PHC 18 phone charger can easily be stored in a Systainer and carried anywhere

enables three smartphones to be charged at the same time:

With its classic USB-A and USB-C ports and its inductive charging surface

**Main Applications:-**

Charging smartphones via USB or simply by inductive charging. Whether in workshops, on construction sites or just about anywhere

Up to three smartphones can be charged at the same time using the two USB ports and the inductive charging surface

For cordless freedom, even when charging smartphones its inductive charging surface also allows the smartphone to be charged wirelessly if you cannot find the right charging cable (provided that the smartphone supports inductive charging).

Powerful connections for every charging cable

The standard USB-A and USB-C ports, each with 12 W of power, mean that any mobile phone can be connected to the PHC 18 phone charger.

Supplies power to up to three smartphones at the same time

The classic USB-A and USB-C ports and the inductive charging surface enable the charging station to charge up to three smartphones at the same time.

Tailor-made to Festool battery packs

Simply use the PHC 18 phone charger with one of the Festool 18 V lithium-ion battery packs with a capacity of 6.2 Ah, 5.2 Ah, 4.0 Ah or 3.1 Ah (with the exception of the 3.1 Ah Ergo battery packs).

Rubberised surface for a secure holds

During inductive charging, the rubberised surfaces ensure that the smartphone is held securely, even on uneven subsurfaces.

Compact design for easy transportation

The dimensions of the PHC 18 phone charger are comparable with a 3.1 Ah compact battery pack, meaning that it can simply be stored in a Systainer and carried anywhere.
