FEATURES

The 380mm surface cleaner works with your petrol pressure washer to quickly deliver professional level cleaning without splash back. It cleans with two spinning nozzles instead of one, significantly reducing your cleaning time and eliminates streaks by keeping the nozzles at a fixed height from the surface.

It can also be used to clean vertical surfaces such as garage doors and home siding doors. With a quick connect fitting for compatibility with a wide range of pressure washers, you can now get more out of your pressure cleaner with this handy attachment thanks to its heavy duty brush and rotating nozzles that clean a larger surface area to make short work of even the biggest jobs!

SPECIFICATIONS
