Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

Save time and eliminate costs. For all Festool C18 and T18 cordless drills with FastFix interfaces (except CXS/TXS). Switch between functions in seconds with the FastFix interface, saving time and eliminating the cost of dedicated, single purpose tools. The Festool FastFix Depth Stop Chuck is designed for consistent, precise depth setting regardless of material density. Integrated clutch maintains depth of fastener placement independent of torque setting. Green quick out ring backs out screws without affecting depth setting. Great for jobs where you want to make sure the screws are perfectly flush every time, including dry wall, decks, and cabinets. Getting it right the first time eliminates waste of material and fasteners and saves valuable time.
