### TITANIUM NITRIDE COATING.

The Titanium Nitride coating significantly increases the tool life by providing the following benefits:.

- Increased surface hardness to 85HRC.
- Ceramic surface, reducing friction by up to 30%.
- Especially resistant to cold welding.
- Suitable for cutting a wide range of materials.

### M2AL HIGH SPEED STEEL MATERIAL.

M2AL High Speed Steel is a high alloy material with a hardness of up to 67.5 HRC, designed for increased endurance of the cutting edge and tool life.

### STEP HARDENED PROCESS.

This state of the art manufacturing process produces cutters with extremely hard tooth tips for increased cutter performance, while maintaining a softer body which is less susceptible to breakage than standard high speed steel cutters.

### MULTI-CUT GEOMETRY.

Provides smooth and fast cutting, with decreased chatter. This also increases the cutters ability to remove swarf away from the cut, and helps to enhance centring.

### FULLY GROUND WITH INTERNAL RELIEF.

This feature allows Holemaker cutters to produce reamed quality, burr-free holes, and also helps to reduce torque and horsepower requirements.

### UNIVERSAL SHANK.

19.05mm (¾") Universal Shank with 2 flat sections to suit most magnetic base drilling machines.
