### 1080mm Guide Rail 491504 by Festool

Made from anodized aluminium, Festool Guide rails are available in eight different lengths from (800 - 5000 mm), providing the right rail for every application. The integrated splinterguard aligns perfectly to your cut line, saving set up time and serving as protection against tear out, on cuts both with the grain and across. Guide rails make work easier by taking the tool to the work, and save time and money by eliminating laborious measurements, rework and wasted material. Connect rails using Festool Guide Rail Connectors to make limitless cuts. Non skid, dual clamping rubber strips prevent movement during the cutting operation, saving significant set up time.
