Manufactured in	Spain
Packaging + Shipping	
Shipping Weight (Gross)	2.8 kg

The template is designed to facilitate the fast and perfect placement of frames and seam-strips in doorsteads, securing them by means of polyurethane foam. The frames and seamstrips can be placed in new or old doorsteads, and the existing door can be used in the latter case. The use of polyurethane foam guarantees total durability, making the door extremely robust. It sets fast (in under 10 minutes), enabling rapid work and optimum use of the available time. The template supports a wide range of door sizes based on standard UNE 56802.

Door Sizes Supported:

Height from 1905 to 2160mm

Width from 620mm to 1020mm

Depth from 35 to 45mm

Width from 1240 to 1640mm can be reached with the optional Double Door Extension Jig Kit 8345175 (sold separately).
