

TEMPLATE FOR ELLIPSES AND CIRCLES PE60 BY VIRUTEX

Multi radius template for trimming circular or elliptical forms. Ideal for manufacturing mirrors, windows, doors or any other decorative items by means of an elliptical or circular trimming. The use of the two guide supports (standard equipment) allows the elliptical trimming and the use of only one support allows the circular external trimming or moulding. The PE60 is also equipped with two suction pads for fixing it to the panel to be trimmed. Thanks to them it is possible to trim in an easy way without to perforate the surface. If it is not possible to use the suction pads there are several holes to fix the template by means of screws. Includes two rod guides Ø 8 mm for using with all the Virtutex routers.

Features

Ø Guides for using with routers: 8mm

Maximum Circle / Ellipse Radius = 3200mm (3.2m)

Minimum Circle / Ellipse Radius = 600mm

Options

6045714 Special coupling rods for FR292R

6045708 Set of coupling rods Ø 10mm

6045709 Set of coupling rods Ø 12mm

6045710 Set of two clamp screws
