Adjustable Angle Bevel Jig for Angle Measurements

SM-KS 120 / 494370 by Festool, Manufactured in

Germany

The MiterFast Angle Transfer Device quickly and easily transfers exact angles to the miter saw, enabling precisely matched cuts for inside or outside corners. Center of cut line is coated with a reflective paint, for easy reference with the Kapex miter saw's dual-laser lines. For absolute simplicity, the MiterFast operates off of basic geometry, eliminating the need to record or remember detailed angles or fractions. Locks securely so your measurements make it to the saw for reliable cutting. Designed for use with the Festool Kapex, but works with any laser equipped miter saw. Includes one MiterFast Angle Transfer device. Compatible Tools:-

KS 120 KAPEX Slide Compound Mitre Saw

Industry Recognition:-

The Smart Bevel won the International Forum Design award for product design 2007.
