Barcode	9313478190205
Brand	Arbortech
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

The *Industrial Woodcarver™* is the professional choice in rotary woodcarving. This blade carves the hardest and the softest wood with equal smoothness, efficiency and control. Unlike the other 100mm Arbortech blades, this blade can be used for straight cuts in wood projects. The *Industrial Woodcarver™* is designed to fit the *Power Carving Unit™* or any standard 100mm (40") or 115mm (4 1/2") grinder.

Features:

The Industrial Woodcarver is our best rotary carving blade. It is the smoothest woodcarving blade available, and you will never have to replace the blade due to interchangeable and rotatable tungsten teeth. It is recommended that the blade is always used in conjunction with the Arbortech Pro Guard

Applications:

Freehand power carving
Rough shaping
Medium to large projects
Ideal for major wood removal in sculpting (busts, chairs, burls, rocking horses etc)

Benefits:

Easy to use
Extremely controllable
Hollow ground, rotatable and replaceable carbide tungsten teeth for excellent carving feeling and long product life
No kickback

Kit Includes:
