Country of Origin	
Manufactured in	Germany
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

100m Solid Colour Laser Fusion Edging Graphite 23 x 1.2mm STMDF2210 by Rehau , Manufactured in Germany

We stock a range of Laser Fusion Edging (refer options) with a huge range also available ex Germany (we can stock to your order - Board Matches Guide available here). Available in 200m Roll sizes or cut lengths (refer our Edging Solution Services). **Please be aware that all non stocked colours of Laser Fusion Edging have a minimum 7 week production time in Germany + 4.5 week shipping time (airfreight can be co-ordinated at an additional cost)...please keep these lead time in mind when preparing your job / colour matching** REHAU LaserEdge™ is an innovative adhesive-free laser edging technology. This new, two-layer edgeband, offered in proprietary PP, ABS or PMMA polymer formulations, replaces commonly used edging solutions for all machine technologies currently on the market. LaserEdge is applied using a highly efficient laser that melts a color-matched functional layer on the reverse side of the edgeband and welds it to the carrier board. Features:-

- Permanent invisible seam thanks to a pure polymer, adhesive-free solution
- Exact color match of the functional and decorative layer
- Functional layer matched to the hardness of the decorative layer - no rubbing down of the seam in daily use
- Absolute freedom of color and decorative design choice - all product ranges can be used for laser processing
- Permanent and functional invisible seam
