

250MM 10" 20TPI RIP 1776 TENON SAW WITH BRASS BACKED BLADE AND PISTOL GRIP ENGLISH ELM HANDLE BY PAX

\$399 inc. GST

The Pax 1776 Saw, Thomas Flinn's finest saw and a must have for all woodworking enthusiasts and is our flagship saw. Made with a heavily folded brass back roll marked with "Pax 1776 Sheffield England", it is made as a celebration piece commemorating the start of Pax saws and are made today to the same high standards they were two hundred years ago. The folded brass back means the blade is held under tension offering excellent rigidity and balance. The weight of the brass back aids the fine cutting ability of this saw. This NEW version of the Pax 1776 has a closed handle, made from English Elm and is hand finished with Danish Oil to offer the perfect comfort and grip. This saw is the ultimate in beauty and also in it's unrivalled performance. These saws are all tested before despatch. These saws are hand sharpened. This larger and deeper version of the Pax 1776 has a 5" blade depth with 9tpi in a rip tooth formation will allow much deeper cuts than the standard 1776 saw so would be great for large tenon work or timber framing work etc. **Please note these are hand crafted products - not machine manufactured, therefore perfectly imperfect and unique** **Features:-**
 Hand finished English Elm Handle, danish oiled for ultimate comfort
 Solid Brass Screws and Caps
 Mirror Finished Brass Back with traditional style roll mark "PAX 1776"
 Hand Sharpened
 Can be Re-sharpened
