The Lynx Dovetail with Beech is also made with the same ideals as the Lynx Handsaws and Tenon Saws with Beech handle and will provide excellent dovetailing results. Made using alloy spring steel with a heavy folded brass back and brass plated screws fitted in the steamed beech handle. Individually packed in a branded card box - can be recycled. Available in either rip tooth (for cutting with the grain) and in crosscut tooth (for cutting across the grain). Lynx saws are a brand from the E. Garlick & Son Saw

company that dates back to 1858 here in Sheffield. Blade depth is 57mm (2-1/4")

Features

Clear Beech Handle Linished Brass Back Laser marked with Lynx logo Can be re-sharpened Options
