Shipping Weight (Gross)	1.48 kg

The *TURBO Shaft™* is more than just a detailed freehand power carving tool. Simply attach to the *Power Carving Unit™* or a standard 100mm (4") or 115mm (4 1/2") grinder, this unique attachment is a versatile addition to any woodworker's arsenal.

DEEP AND NARROW PROFILES

Out of the *TURBO* Range, the *TURBO Shaft™* is the best option for achieving detailed narrow, deep carving and sculpting due to its compact and narrow design.

Hollowing out your project has never been so easy with the *TURBO Shaft™*, making this a truly unique woodworking tool for this specialised task.

LETTERING AND TEMPLATE WORK

Ideal for signs, text, fluted columns, decorative effects, detailed sculpting, creating recesses, and template work. Use with guides and templates for accuracy. The clever depth gauge collar helps control cutting depth when needed and also acts as a guide for achieving different profiles.

FREEHAND SHAPING

Perfect for deep and narrow profiles, lettering, template work, and more, the *TURBO Shaft™* provides a unique combination of efficiency and control. Equipped with durable tungsten carbide teeth, the *TURBO Shaft™* includes an adjustable depth gauge making it easy to quickly set your preferred cutting depth in even the hardest of timbers.

PERFORMANCE, SAFETY & CONTROL

The *TURBO Shaft™* is fitted with replaceable carbide teeth for excellent performance and durability even with the hardest timbers. Rotate the carbide teeth to extend the cutting life even further.

With SafeBlade technology, the minimal side-exposure of the cutters results in excellent control and safe freehand use without kickback.
