Shipping Weight (Gross)	6.7 kg

The 500mm (20") Heavy Duty Wall Fan is packed with features to assist and help you get the job done comfortably. Features such as an energy efficient induction motor, 3 speed pull cord or turn switch, high velocity air flow, heavy duty constructed wall mount bracket & safety grills, 5 aluminium blade construction, oscillation and tilt function. The 5 aluminium blade construction is different to what is conventionally seen in the market delivering up to 5% more air velocity to most standard 3 blade fans available. With an impressive air velocity of 115m³ per minute this unit is perfectly suited to ventilating small to medium areas inside. The fan is fitted with a 3 speed switch which has both a pull cord and standard turn action allowing you to operate the product without needing a ladder in most cases. The fan requires minimal assembly so you can ventilate the office, shed, workshop or jobsite quickly once installed onto your wall or fixture. With standard oscillation and tilt functions you can position the fans air flow almost anywhere quickly and easily to ensure ventilation is provided exactly where your need it. The entire KINCROME fan range complies to all safety and standards requirements including testing conducted to tropical class T clause. KINCROME Heavy Duty fans are built tough and will last the distance when using them out in the field.

Features:

- Heavy Duty Fan
- 3 Speed Turn/Pull Cord Switch
- 5 Aluminium Blades
- 111W Induction Motor
- 115m³/min Air Delivery
- Adjustable Tilt & Oscillation
- Noise Level 69 dB
- Complies to AS/NZS & Climate T Approvals
