As used in the Thomas Flinn factory, solid brass split nut style saw screws and caps. Many people find these useful for replacing lost screws or to revamp old saws for use.

These have an M5 thread and have a 12mm diameter head. They are intended to fit handles around 22.5mm thick.

Sold as individual screw and cap complete.

We have a choice of 3 different screws and caps: solid brass or brass plated or solid brass split nut style (countersunk).
