Milwaukee's wood cutting, framing blades maximise life and cutting efficiencies to improve your productivity. An anti-friction coating keeps the blade cool while cutting and resists corrosion & gumming. Laser cutting technology creates the blade from 100% sheet steel to ensure a stable blade that increases cutting accuracy. Laser cut vibration slots minimise wobble and warping during use. A thin kerf design delivers faster cuts as well as more cuts per charge when using a cordless tool.

Features

24T for fast cuts in softwood, hardwood, plywood, OSB, treated timber

Anti-friction coating: Anti-friction PTFE coating for cooler & smoother cuts

Cobalt infused carbide teeth: Extend cutting life and maintain tip sharpness

Laser-cut vibration slots: Resin-filled slots to absorb vibrations and reduce wobble for increased cutting accuracy

Universal arbor system includes reduction rings to fit most circular saws

Thin kerf design for cordless optimised performance
