

4KG EVA HOT MELT ADHESIVE PELLETS IN NATURAL UNIBORD 636 BY UNICOL

Unicol offers a vast range of hot melt glues which are suitable not only for the types of edge used, but also for the application characteristics of the systems and the degree of resistance and finishing desired. Solid hot-melt adhesive with EVA base for application with manual edge-banding machines. It is used for gluing edges made of veneer, solid wood, plastic laminate, melamine-base materials, ABS and PVC. It is characterized by long open time, quick setting speed and a good heat resistance of the glue joint. With the addition of from 10 to 30% of this product to a product for straight a faster melting speed, longer open time and better adhesion on difficult supports are obtained.

Applications:-

For gluing edges made of veneer, solid wood, plastic laminate, melamine-base materials, ABS and PVC.
Suitable for long open time, quick, speed setting and good heat resistance of the glue joint.
Suitable for Manual Edgebanding Machines
