Jacquard Pearl Ex Pigments can be used to add a lustrous glow to paintings, drawings, sculpture, stamping, jewelry, resin art and more! Jacquard Pearl Ex Pigments exhibit extreme colourfastness and stability. They are made from powdered mica, are non-toxic and will never rust or tarnish making them ideal for use in interior, exterior, and archival applications. Incorporating Pearl-Ex pigments is easy, just mix into any viscous medium like epoxy resin, oil, acrylic, gouache, varnish, wax, paper pulp, or clay. Use them for collage and mixed media art, calligraphy, faux-finishing, sculpture, papermaking, printing, candlemaking, pottery, resin, polymer clay and more. **Features:-**

For use on polymer clay, encaustics, paper, shrink plastic, leather, glass, canvas, wood, and more!

Pearl Ex is a safe, inert pigment that exhibits extreme colorfastness and stability.

Pearl Ex Powdered Pigments may be used any time a metallic or pearlescent effect is desired: mix them into acrylics, oils, printing inks, encaustics, alcohol inks, epoxy, glues, casting resins, clay, varnishes

NOT for cosmetic use.

Made in USA

Pearl Ex Pigments are nontoxic, inert powdered pigments that exhibit extreme colour fastness and stability. Ideal for interior, exterior and archival applications, they can be incorporated into any viscous medium, eg oil, acrylic, varnish, clay or they may be spread dry on any porous surface. Can also be used for Resin Art.

Our most versatile product yet, Pearl Ex Powdered Pigments may be used any time a metallic or pearlescent effect is desired: mix them into acrylics, oils, printing inks, encaustics, alcohol inks, epoxy, glues, casting resins, clay, varnishes – the list goes on!

Try it mixed with Gum Arabic for a DIY metallic calligraphy ink or watercolor, in the Pearl Ex Varnish for working on non-porous surfaces, or mixed into one of Jacquard's colorless extenders for use on fabric.

Pearl Ex is a safe, inert pigment that exhibits extreme colorfastness and stability. The different particle sizes produce different effects, from a smooth pearly luster, to a highly metallic sheen. Pearl Ex creates a metallic effect without being a real metal – it will never tarnish or fade!

Note: Pearl Ex Powdered Pigments were specifically developed as an art material. They are NOT for cosmetic use.

FABRIC/FIBER/SURFACES polymer clay, encaustics, paper, shrink plastic, leather, glass, canvas, wood, and more! Mix with a binder to use on natural and synthetic fibers.
