Barcode	7090050560091
Brand	Viking Arm
Country of Origin	
Manufactured in	Norway
Packaging + Shipping	
Shipping Weight (Gross)	1.95 kg

Your Imagination Sets The Limits - With a lifting capacity of up to 150kg, the range of applications is virtually unlimited. The installation of doors, windows, and cabinets are obvious uses, but flooring and the construction of porches, decks, and frameworks are also perfect opportunities to use this ingenious tool. All this and much more can easily be done with controlled precision thanks to the unique construction of the VIKING ARM® tool.

Another great feature of the VIKING ARM® is that it reduces the number of hands needed for certain types of installation work. This allows for better economics in the professional field and a significant reduction in frustration among home improvers. It saves time, money and your...back.

Debris and dust can cause damage over time. Cleaning the tool regularly is essential to their proper functioning. Clean it by simply wiping over with a rag, lubricate the shaft and moving parts, and wipe over again. If the arm is dirty, provide a good wash with water and soap. Do not use any other detergents. Dry it, oil it and wipe over. You may lubricate with any fine technical oil.

When not in use, store your Viking Arms in a dry area, safe from moisture and dust.

### Features

Innovative universal tool

Lift, press, tighten with precision and control

Impressive capacity for a compact hand tool
