This safety device is designed to allow people to push wood through a saw, router, or other cutting device while keeping hands clear of the blades. In addition to improving workplace safety, push sticks can also help people better control the pressure on the wood, resulting in smoother, cleaner cuts. Plastic with foam base. Short Push Block with Angled Handle 150mm x 75mm PB-25 by Oltre is designed with a precisely measured foam base, the short push block ensures that wood is guided along a consistent and secure path. This increases accuracy and minimizes the risk of accidents in the workplace.
