This simple to position and simple to use 20Pce featherboard (Feather Board) kit is a safety device to use when working with stationary routers and powered saws such as table saws and bandsaws. The featherboard applies pressure against the workpiece, keeping it flat against the machine table or work fence.

Features

Dual Axis Feather Board

Naturally aligns parallel to machine table using no-fuss two-axis adjustment

Full reversible by flipping feather section over

Stackable - using the long bolts provided

Suits

Router Tables

Table Saws

Bandsaws and more
