Anvils were first made of stone as a lithic stone tool, then bronze, and later wrought iron. As Steel became more readily available, Anvils were faced with it.

Our Vices are made from High quality hardened **Spheroid Graphite Iron** (S.G. Iron Steel), and we guarantee our products are unbreakable since this is one of the strongest in the range of Vices being manufactured for heavy Duty Applications and has a very high ductile strength. Therefore it does not break in the normal course of its life for its utility. This is one of the main reasons we provide a **Lifetime Warranty** (Vices & Anvils only).
