Size	194mm
Dimensions	
Product Weight (Net Weight)	1.25 kg
Packaging + Shipping	
Shipping Length	11 mm
Shipping Width	17 mm
Shipping Height	23 mm
Shipping Weight (Gross)	1.48 kg

The large router plane is based on the **Stanley 071** design and is available in open and closed mouth. This plane is used for cutting shallow mortises for hinges, inlay, grooves, and dadoes. Also used for a precise depth of cut. The plane has a fine screw feed for adjusting the depth of cut and a square blade for the shaft that is rigid and will not rotate under planing force. The open mouth blade can be reversed if you need to work into a corner. The closed mouth gives more support to the front of the blade which is good for cleaning the end of a groove or the edges of boards. A heavy ductile cast iron body with a 9.5mm (3/8") square bevel blade and hard wood knobs. It is a fine quality traditional plane manufactured to precise Tolerances and therefore suited to the most demanding craftsman.
