Key Features

Superior TCT (Tungsten Carbide Tipped) Construction: The ToughCut Circular Saw Blade is engineered with high-quality TCT tips, ensuring exceptional strength and wear resistance. This design enables the blade to maintain its sharpness through numerous cuts, providing consistent and reliable performance over time.

Perfect Size for Accuracy: With a diameter of 250mm, a bore size of 30mm, and 80 ultra-sharp teeth, this blade delivers precise and clean cuts. Say goodbye to chipping and splintering, as the ToughCut blade guarantees smooth and chip-free melamine cutting.

Specially Designed for Melamine: Melamine is known for its delicate and brittle nature, but fear not – our ToughCut blade has been optimized to handle the challenges of cutting this material. It minimizes heat buildup, reducing the risk of material damage, and extends the blade's lifespan.

Versatile Applications: While primarily designed for melamine cutting, the ToughCut blade is versatile enough to handle various laminated materials, including veneered plywood and
