Price Vs Quality	
Quality	Economy (Suitable for DIY / Hobbyist Use)
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg

A bi-metal bandsaw is a versatile cutting tool that uses a blade made of two materials: high-speed steel teeth and alloy steel backing. It provides precise and efficient cutting through a wide range of materials such as wood, metal, and plastics. The high-speed steel teeth offer durability and sharpness, while the alloy steel backing provides flexibility and toughness. This combination ensures clean cuts, reduces vibrations, and extends the blade's lifespan, making it a cost-effective choice for professionals and DIYers.

- Features
- Versatile cutting tool with a blade composed of high-speed steel teeth and alloy steel backing.
 - Designed for precise and efficient cutting through various materials such as wood, metal, and plastics.
 - High-speed steel teeth provide durability and sharpness for extended blade life.
 - Alloy steel backing offers flexibility and toughness to withstand cutting stress and reduce the risk of breakage.
 - Provides clean cuts, reduced vibrations, and improved cutting performance.
 - Suitable for both professionals and DIYers, offering cost-effective cutting solutions.
 - Ideal for workshops, construction sites, and home projects.
- Made to Order - Please allow one week if we are out of stock or for custom sizing.
