PETG VACUUM FORMING SHEET (TRANSPARENT)

Our PETG Sheet (Transparent) is a high-clarity, impact-resistant thermoplastic that is suitable for both indoor and outdoor applications. With its excellent chemical resistance and superior mechanical properties, it is a safe, durable, and cost-effective choice for any project.

PETG is a food-safe plastic that's commonly used for food containers and bottles for liquid beverages. Like acrylic and many other thermoplastics, PETG is fully recyclable. PETG is both thermoformable and vacuum-formable, and can tolerate a tremendous amount of pressure without cracking.
