ChemSet™ Anchor Studs are made from Grade 5.8 carbon steel to get the most out of adhesive tensile capacities and provide higher shear capacities than regular Grade 4.6 grade studs. Galvanising of ChemSet Anchor Studs meets Australian Standards. Stainless Steel ChemSet™ Anchor Studs are high corrosion resistant AISI 316 (A4). External hex drive avoids jamming common with hex bar driven studs. External hex does not collect rainwater leading to accelerated corrosion in internal hex drive
