Part #

Special purpose planer for flushing works in the manufacture of furniture. It is ideal for flushing strips on the edges. Provided with a large support surface to allow easy and safe operation. The tool cuts accurately and is easily adjustable. The support base is height-adjustable with respect to the cutting plane of the cutter-holder. Thanks to its high power rating (1,300 W) it can be operated without risk of mechanical fatigue. It is provided with replaceable reversible carbide blades which do not require adjustment and dust collector connection.
