Part Number	SVN470
Brand	Virutex
Packaging + Shipping	
Shipping Weight (Gross)	5.6 kg

Designed for connection to the SVE600 vacuum electric fastening system included in the original.

The SVN450 and SVE670 tilting fastening systems are formed by basic systems SVN250 (for model SVN450) and SVE350 (for model SVE670), mounted on a folding support. They allow the machining of the edge and face of the piece without changing clamping.

The SVN450 model incorporates an air distributor with four free outputs for the connection of auxiliary units SVN470 or SVN250, equipped with stopcock and quick connector to the pneumatic network.

The SVE670 model has a free socket for the connection of auxiliary units such as SVE680 and SVE350. Both models include a tightening clamp for fastening to the workbench and a set of three rubber gaskets of different perimeter.
