Country of Origin	
Manufactured in	Taiwan
Packaging + Shipping	
Shipping Length	58 cm
Shipping Width	33 cm
Shipping Height	33 cm
Shipping Weight (Gross)	3.35 kg

Connect dust in your tank and not your vacuum filter! This simple and efficient solution aids in cyclonic dust separation methods - the combination of convenience of being able to easily empty the collection bin, combined with only a small amount of dust getting to the vacuum itself (and filling the dust bag). Connect your vacuum to the central vertical outlet and setup the collection hose to the side / angled outlet on the lid (this allows for the dust to spin around the edge, the dust is heavy and spins to the outside of the bin hitting the edge of the bucket and causing it to drop down to the bin base). **Specification:-**

- 22L Translucent Plastic Bin with Lid and Attachments / Fittings to connect to standard Vacuum
- 12" 2 stage cyclone dust separator
- 2 x 2-1/2" PP Hose
- 1 x 2-1/2" Elbow
