Achieve unparalleled precision in your woodworking projects with the Oltre Universal Router Base. Designed to fit a wide range of handheld routers, this accessory streamlines your setup while delivering exceptional stability and control. Crafted for compatibility with popular router models, the Oltre Base eliminates the hassle of multiple baseplates, simplifying your workshop organization. Its robust construction minimizes vibrations, ensuring smoother cuts and superior accuracy, whether you're tackling intricate joinery or large-scale tasks.

Experience versatility with guide bushing compatibility and offset mounting holes, enabling a variety of cutting styles like template routing and dovetailing. The transparent design offers enhanced visibility, while pre-drilled holes allow for easy accessory integration, including edge guides and dust collection attachments.

Upgrade your routing experience with the Oltre Universal Router Base and unleash your creativity with confidence and precision. Elevate your craftsmanship today.

Specification
176mm Dia. x 7mm
