Feed Speed	10-30m / Min.
Softening Range	105-115Å°C
Temperature on Roller	190-220Å°C
Temperature in Tank	170-190Å°C
Dimensions	
Product Weight (Net Weight)	20 kg
Country of Origin	
Manufactured in	Italy
Packaging + Shipping	
Shipping Weight (Gross)	20.0 kg

Solid hot-melt adhesive with EVA base for automatic edge-banding machines. Characterised by high yield value (more than 30% higher than the traditional products), excellent specific adhesion, good solvents and water resistance, this product presents a transparent glue line. No problem of spinning and filaments in usage.

Applications:-

It is used for gluing edges made polyester, of solid wood, plastic laminates, melamine-base materials, PVC and ABS with primer, particularly when a frequent change in the colour of the glue should be requested.

Suitable for softforming and for HOMAG and IMA work centres.
