Model	
Type	Combination Planer & Thicknesser
SKU	8601478
Part Number	300CS 240V
Brand	Sicar
Technical - Main	
Power Source	240V 50Hz Single Phase
Dimensions	
Product Weight (Net Weight)	290 kg
Packaging + Shipping	
Shipping Weight (Gross)	1.48 kg
Shipping Notes	This product exceeds hand unloading limits and requires a tail lift truck or forklift at the unloading location (Receivers end).

The 300C Combined Machine has been specifically designed to be an industrial standard machine, but at a size intended for the factory and small professional workshop. This industrially rated machine features a planer, thicknesser and mortiser unit. The cast iron construction, accurate cross cut fence and superb build quality put this machine in a class of its own. The planer thicknessing function, again is of the highest quality, extremely powerful, accurate and the end result is simply sublime. The inward swing of the thicknessing unit keeps this machine compact in every function, whilst the cast iron construction means even heavy pieces can be handled confidently. Several further options are also available, each machine can therefore be tailored to the users specific needs.
