Shipping Weight (Gross)	0.48 kg

The Brumby Twistknot Cup Brush is ideal for aggressive brushing and contaminant removal. It performs best in medium/heavy duty applications, and is great for scale, rust and paint removal.

Twistknot HD steel wire can be used on a huge range of surface materials including steel, brass, iron, plastic and wood. It is not recommended for use on stainless steel, aluminium or copper, as this may cause rust contamination. This brush is fitted with a quick change multi-thread, which allows for quick and simple fitting of the brush onto all angle grinders.

Use with M14 Drill Adaptor BDBPA for use in a drill.

Some examples of use for Brumby Twistknot Cup Brushes include:

Removing rust and paint from gutters

Removing rust and flaky paint from trailers

If a twistknot cup brush is too aggressive for your work piece/project, and you need a wire brush that is more suitable for light duty applications, take a look at Josco's range of crimped wire brushes instead.
